

Honeywell 1000 Series Zone Valves are the industry leader, the time-tested choice that professionals continue to use.

Why? Because the reliable 1000 Series is designed for service and convenience — when there is a need to change one, you'll find that replacement is fast and easy. You won't have to stock a variety of valves, because 1000 Series zone valves will fit on virtually every system, and the automatic reset after power failures helps you avoid service calls. Best of all, they work. In short, for all your zone valve needs, you can count on a classic, the Honeywell 1000 Series.

V8043 1000 Series Zone Valve

STILL THE INDUSTRY LEADER.

Built On Honeywell Tradition for compatibility with a full range of thermostats

Easily Upgradeable to premium 5000 Series Actuator

Long-Life Synchronous Motor operates valve smoothly and quietly

Manual Opener With Automatic Recycle allows water circulation during power outage; automatically resets to "Auto" when power is restored

Auxiliary End Switch allows for switching boiler, circulator pump or other device

Triple O-Ring Seal provides three lines of defense against corrosion and leaks

Patented Ball Seal Design provides a new sealing surface each time the valve operates, producing a quality seal and significantly increasing service life
