

ST9120U1011

Universal Electronic Fan Timer

Honeywell

Replaces all others. The New Universal platform that will not only integrate control of all combustion blower and circulating fan operations in a gas warm air appliance but also replace all other existing Honeywell fan timer boards. It now has a replaceable fuse and DIP switch with selectable heat and cool delay for added flexibility. This new fan timer will also save you time and money with its diagnostic LED and continuous EAC and HUM terminal connections. These new options and features make it the best fan timer for your needs.

ST9120U1011 Universal Electronic Fan Timer

On the surface, the job of the ST9120U1011 is very simple: monitor temperature demands and run the fan as needed, but the ST9120U1011 also handles all the little complexities of the job. And best of all, it's ready to work in just about every situation, replacing more than 44 other models.

Smart Choice

The ST9120U1011 monitors the thermostat for heat, cool and fan demands, runs the induced draft blower motor and runs the circulating fan (up to two speeds) as needed. It also monitors limit switch strings and energizes ignition control. In short, this one little unit packs a big punch, making it a smart choice for your applications as well as your business.
