

# Cartridge Cage Valves

THE FLEXIBILITY AND POWER YOU NEED  
TO GET THE JOB DONE

- Modular design makes this the fastest and easiest valve to install and service
- Unique bayonet connection of actuator to valve requires no tools
- Sizes from 1/2" to 1 1/4" sweat or NPT connections
- Choice of 2 position, floating, modulating, and fail safe proportional actuators available
- Standard 60 psi close off on all models makes selection easy
- Replaceable cartridge design rebuilds the valve without removing the body from the piping for easy future service
- 300 psi static pressure rating
- Corrosion resistant, engineered plastic actuator housing can cope with condensing atmosphere

**Honeywell's VC Valves feature  
a field replaceable cartridge  
with all working parts**
